MARINE MAMMAL
FOUNDATION

trakMM © is an Marine Mammal Foundation initiative that allows the community & industry using the waterways to log sightings of marine mammals. We acknowledge that our researchers cannot be on the water all the time so with the community's help in logging sightings, researchers can formally record those sightings and assess areas of significance for marine mammals.

Please fill in the below sheet and email to info@marinemammal.org

Thank you for your involvement in Marine Mammal Foundation Citizen Science program.

Date	Time	Location: GPS (preferred) or general	Marine mammal ID*	Behaviour	Notes (calves present, #in pod, vessels present)

* Dolphin / Whale / Seal / Dugong (if known please enter the species ie humpback whale, Burrunan dolphin, common dolphin)

Please note:

- Boats not permitted to approach dolphins or whales within 100m: Jetskis not permitted to approach within 300m (Victoria)
- In narrow waters, you cannot approach closer than 30m – unless navigating for safe passage
- If deliberately approaching dolphins or whales closer than prescribed you may be liable for prosecution.
